

## Introduction

## RPM Made Easy

In 2018, the Centers for Medicare and Medicaid Services (CMS) began reimbursing providers for remote patient monitoring (RPM) after recognizing the growing evidence that such monitoring reduces hospitalization rates, enhances care coordination, and improves patient outcomes.

ChronicCare's Remote Patient Monitoring (RPM) services help proactively manage chronic conditions, identify deterioration earlier, and stay continuously connected to your patients—without adding operational burden to your team. **We can assist you by providing 24/7 nurses to remotely monitor your patients. We provide FREE medical devices to your patients.**

## Care Management

Remote patient monitoring technology can be used to manage a variety of acute and chronic conditions or symptoms, including:

- **High blood pressure and other heart conditions**
  - A remote blood pressure monitoring cuff allows the patient to take their reading and instantly send the data to your electronic health records for your review.
- **Diabetes**
  - Internet-connected glucose monitors allow you and your patients to track blood sugar levels in real time.
- **Weight loss or gain**
  - Bluetooth-enabled "smart scales" are popular with patients because they can connect to wearable fitness tracking devices, among other reasons.
- **Respiratory disease (COPD, Asthma)**
  - Common devices including spirometers and pulse oximeters are used to help patients with respiratory conditions, including lung conditions and asthma.

## Billing Codes for RPM

### First Month

#### Initial Enrollment

**99453:** Initial device setup and patient education. One-time.

Averages \$21.

**\$21**

### Monthly

#### Base Monthly RPM

**99445:** 2-15 days of device use data.

**99454:** 16+ days of device use data.

Averages \$47.

**\$47**

#### Initial Care (20 min)

**99470:** 10-20 minutes of clinical monitoring. \$26.

**99457:** First 20 minutes of clinical monitoring. Averages \$51.

**\$98**

#### Additional (40 min)

**99458:** Each additional 20 minutes of clinical monitoring.

Averages \$41.

**\$139**

#### Additional (60 min)

**99458:** Each additional 20 minutes of clinical monitoring.

Averages \$41.

**\$180**

Our turnkey, compliance-first RPM program integrates seamlessly into your workflow, supports Medicare reimbursement, and delivers measurable improvements in outcomes, engagement, and revenue.
