

ChronicCare

# Remote Patient MONITORING (RPM)

## Care Coordination for Value-Based Care Success

Our remote patient monitoring services empower healthcare providers to remotely monitor vital signs and health trends. This innovative approach enables medical professionals to deliver personalized care and intervene early.

- Analyze patient data through remote device integration - anywhere, anytime
- Increase patient collaboration and proactively manage patient health
- Monitor trends to optimize future care delivery
- Quickly bill and submit accurate time and device claims to maximize revenue
