THE MODERN PHARMACY DILEMMA

Shrinking Margins: PBMs and DIR fees are eating your profits

Staff Burnout: Your team is too busy filling scripts to provide deep clinical care

Patient Retention: Big-box chains and mail-order services are threatening your local loyalty.

WE HANDLE THE WORK. YOU GET THE RESULTS.

Dedicated Care Coordinators

Seamless Documentation

Medication Adherence

BENEFIT	How It Helps Your Pharmacy
New Revenue	Recurring monthly Medicare reimbursements (CPT 99490)
Star Ratings	Improved adherence directly boosts your performance metrics
Zero Overhead	We provide the software and the clinical staff
Clinical Excellence	Better outcomes for patients with hypertension, diabetes, and COPD

HOW IT WORKS (THE 3-STEP PROCESS)

1. IDENTIFY

Identify eligible Medicare patients

2. ENROLL

We reach out to your patients

3. EARN

Monthly calls and documentation

TESTIMONIALS

"Adding CCM was the best decision we made this year. We saw a \$5000 increase in monthly revenue in just 90 days. Our diabetic patients saw an improvement in their A1C levels."

Dr. Sarah J, Independent Pharmacy Owner

READY TO GROW YOUR PHARMACY REVENUE?

Don't let your pharmacy be defined by declining reimbursements. Let's calculate your pharmacy's potential CCM revenue together.

HOW INDEPENDENT PHARMACIES ARE ADDING CCM REVENUE IN 30 DAYS

Independent pharmacies are trusted healthcare hubs, but shrinking margins on dispensings hinder growth. Chronic Care Management (CCM) lets you **monetize expertise** and patient relationships **without increasing overhead**.

What is Chronic Care Management (CCM)?

CCM is a CMS initiative to support Medicare patients living with chronic conditions.

CMS requires a minimum of 20-minutes of non-face-to-face care coordination per month. Pharmacies who participate can benefit financially, stand out from the competition, support patients, and improve Medicare Star Ratings.

Should I Bring CCM to My Pharmacy?

Yes.

Patients visit community pharmacies **12-35 times** a year - far more than PCP. You already know who struggles with medications; be compensated for helping. Not to mention CCM can improve the pharmacy's Star Ratings and the clinical outcomes of your most complex patients.

Will CCM Interfere With Pharmacy Workflow?

No.

ChronicCare offers a full-service, pharmacist-led model. We build a care team around your enrolled patient populations, providing clinical touch points on a monthly basis. Your workflow largely remains unchanged.

Will You Need to Hire Additional Staff For CCM?

No.

Partnering with ChronicCare means your pharmacy gets a turnkey solution for CCM. This means your staff can focus on introducing the program to eligible patients, our virtual care team will be responsible for providing the service each month.

Estimated Monthly Revenue (CPT 99490)

Patient Count	Est. Monthly Revenue	Est. Annual Revenue
50 Patients	\$3,000	\$36,000
100 Patients	\$6,000	\$72,000
250 Patients	\$15,000	\$180,000
